

Before Building Your Driveway

Please follow these steps before you start construction on your driveway:

1. Call Planning & Engineering (below) to request stakes for the future sidewalk elevations. Give us at least a weeks' notice, please.
2. We will place the stakes to guide form placement for the new driveway.
3. Place forms and construct driveway based on stake elevations.
4. Contact Planning & Engineering for driveway inspection after pouring.
5. We will advise you of inspection result and refund Driveway Deposit based on inspection result.
6. Call Planning & Engineering when you are ready for landscaping.

Call the Planning & Engineering with questions:
